Skylight Application

A person stands on the peak of a dark, jagged rock, their arms raised in a gesture of triumph or joy. They are silhouetted against a bright, orange and yellow sunset sky. Below them, a vast, undulating sea of white clouds stretches to the horizon. In the distance, dark mountain ranges are visible under the fading light. The overall mood is one of achievement and transcendence.

SILVER

With its clean lines and modern design, Silver is an unobtrusive yet stylish way to get the best out of your outdoor area, distinguishing itself from other establishments in the neighbourhood.

SILVER
PLUS

MAXIMUM DIMENSIONS

Width	1300
Projection	1000
Max Rail Centers	450

Silver Plus is a retractable roof system, adapted to aluminium structure. With its clean and modern design, Silver Plus adds value to your outdoor areas.

The product is usable according to its User Manual in all-weather conditions and designed to be used in all four seasons. If desired the product can be made into retractable winter garden by closing the sides with different kinds of enclosures.

Palmiye presents a wide range of ceiling covers, with a selection of colours, materials, (such as PVC, fabric) and patterns which are imported from Europe and U.S, with 5 years guaranty against fading and mould.

The entire drainage system is integrated into the structure and lighting systems can be adapted to the ceiling cover which moves together with it.

The Spot Lights or Linear Lights are installed on the aluminium profiles and can be controlled by a remote control or with a remote controlled dimmer function.

Each of our products is hand crafted and in itself unique, and from ceiling cover to construction material, you can completely customize your products.

Palmiye is proud to present its own MyPalmiye App which has been designed specifically for Palmiye products and is available at Apple's App Store.

WATER DRAINAGE & SEALING

The hidden part of the drainage system which was ingeniously integrated inside both beams and pillars makes effortlessly possible the discharge of water.

DOUBLE ANTI-AIR SYSTEM

- A This system prevents the wind entering between the ceiling cover, rails and gutter, and creates an airtight space into which the wind cannot enter.

WATERBLOCK

- B This prevents rainwater entering the enclosed area, and leads it directly to the front gutter for perfect water drainage.

Back Seal

STRUCTURAL DESIGN

ELEGANT DESIGN

Palmiye pergolas' aesthetic appearance offers the best for those who desire elegance and perfection.

HIDDEN ASSEMBLY DETAILS

Plus and Compact series provide a clean surface and perfect view by concealing all connection details made with stainless steel screws and parts.

GEOMETRIC CROSS SECTION

With its geometric design, the specially engineered inner section gives maximum strength and wind resistance to the aluminium rail profile.

PILLAR BASE

Stainless steel base hides all the floor installations inside, drains the water to the outside and gives an exclusive finish to your product.

PROFILE CAP CHOICES

Give a personal touch to your pergola by choosing from a rounded or straight ended cap.

HORIZONTAL BEAMS

The front and side beam on the same horizontal level, giving a continuous line throughout the product, ensuring a smooth relaxing overall look, which is a delight to the eye.

* Doesn't include the compact series.

SEPARATE GUTTER PROFILE

RAIN GUTTER **A**

The gutter with its height adjustment feature, provides the anti-air system, in different positions to ensure a perfect fit, according to the inclination of your product.

SEPARATE FRONT BEAM **B**

The separated front beam carries all the weight of the roof without putting any pressure on the gutter. Additionally it is also responsible for carrying awnings and glass systems.

VERTICAL BLIND **C**

Horizontal sun rays can be reduced with a vertical blind. It is a full cassette awning and the Ferrari Soltis fabric, provides shade without interrupting the view.

GLASS SYSTEMS **D**

Different glass systems can be installed directly onto the front beam.

APPLICATION TYPES & SOLUTIONS

RAIL POSITIONING

Standard

Custom

MODIFIABILITY

Allows modifications on the main constructions by changing the main aluminium beam and pillars with steel.

MIDDLE PILLAR REDUCTION

Provides a flexibility to remove the middle pillars by performing optional system changes.

PILLAR POSITION CHANGE

Pillars have the ability to shift up to 50 cm according to the structural needs of the Project.

SKYLIGHT APPLICATION

5-YEAR WARRANTY

All our products have up to 5 years guarantee for the construction and motor. The electronics and remote controls are guaranteed for 2 years.
